

UNIONTOWN AREA SCHOOL DISTRICT

INSECT STING INFORMATION AND AUTHORIZATION

The standard school district procedure will be followed for anyone stung by a bee or an insect:

1. Remove stinger by scraping with a fingernail.
2. Apply paste of baking soda and water.
3. Apply ice.
4. Observe the student closely for 15-20 minutes.

Please check the status of your child's problem:

- My child has a localized reaction (swelling at site of sting).
- My child has a severe reaction.
- My child has begun desensitizing treatment (allergy shots).
- My child is on maintenance doses of desensitization treatment.
- My child has not been desensitized.

Please check the procedure to follow:

- Follow above routine school district policy for bee sting.
- Notify parent at once.
- Give medication as prescribed by child's physician. (The parent must provide the medication and written orders from the physician.)
- Rush the child to the nearest medical facility immediately if necessary.
