

Dear Families,

The Uniontown Area School District, in conjunction with Houghton Mifflin Harcourt Publishing Company, is now able to offer your family access to Go Math Academy for \$10.00 per year! No more searching for help with homework. Go Math Academy is completely aligned with the Common Core Go Math curriculum used in grades K-6, just look for the chapter and lesson number in the tutorials and videos.

Search Go Math Academy on [youtube.com](https://www.youtube.com) for more information!

Go Math Academy allows students to select skills to practice, or be guided through the full curriculum in sequence. A personal math trainer serves up new math practice problems each session and offers step-by-step examples. There are over 700 videos from expert math instructors to help kids work through challenges on their own. Children earn rewards in order to unlock access to games, while parents are updated on kids' accomplishments by email and the parent dash board.

If your family is interested in this excellent resource, please return the bottom portion of this flyer and a \$10.00 check made out to UASD to your child's teacher. Each \$10.00 account allows access for up to 5 children per family and is available in Spanish. We will then send you an access code via email.

An \$80 value for \$10!
